Lotz Armor Edge™ Tops

The core material is 1.125" thick MDF (medium density fiberboard). MDF is a superior material for screw holding abilities exceeding 250 lbs., breaking strength and load tests. The back material is phenolic which prevents moisture penetration to core material. High pressure laminate is bonded to the MDF core. The edge material is Lotz Armor Edge™, a polyurea, which is extremely strong and durable. This edge will not separate from the MDF core material. Top surface choice of most Wilsonart matte finish laminates, chemical resistant laminate or markerboard with phenolic baker is optional.

3mm Tops:

The core material is 1.125" thick particle board with a phenolic backer sheet and high pressure laminate on top. 3mm edge banding is applied to all four sides, radius corners

Hardwood ButcherBlock Tops:

1.75" thick hardwood strips with two coats catalyzed clear lacquer top and sides with one clear coat bottom with eased edges and corners, .125" radius all corners/edges

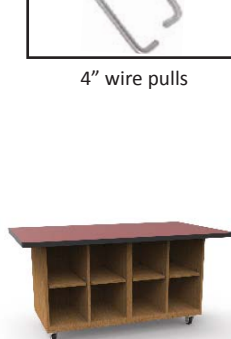

Phenolic Tops

1" thick black phenolic resin and cellulose fiber composite top with .125" radius edge on all exterior edges & corners with high resistance to chemicals, humidity and abrasions.

Stainless Steel Tops

1.625" thick stainless steel top with wrapped and welded edges and corners with particle board core, phenolic backer. 16-gauge, type #304 finish stainless steel. This is not intended for heavy washdown areas.
